PROFESSIONAL SUMMARY

Full-stack developer with hands-on experience across React, Node.js, TypeScript, Python, and SQL, plus experience leading and mentoring peers in a rotating team-lead structure — scoping work, reviewing code, and unblocking teammates across frontend and backend. Comfortable partnering with product and QA to plan, estimate, and deliver features, and driving process improvement through documentation and testing practices.

EDUCATION

Purdue University Fort Wayne

Master of Science in Computer Science (GPA: 4.0/4.0)

Fort Wayne, IN, USA

Aug 2024 – May 2026

Relevant Coursework: Software Project Management, Management of Information Technology, Full Stack Web Dev, Human-Computer Interaction, Low-Code/No-Code Rapid Prototyping, Applications of Deep Learning

American University of Sharjah (AUS)

Bachelor of Science in Computer Engineering

Sharjah, UAE

Aug 2020 – Dec 2023

EXPERIENCE

City of Fort Wayne, City Utilities Engineering

Fort Wayne, IN, USA

Computer Science Intern

June 2026 – Present

- Built and enhanced React + TypeScript components for a financial services product, shipping 9 client-facing features into production.
- Partnered closely with QA and a cross-functional Agile team on scope estimation, code review, and sprint delivery, resolving 4 critical UI/UX issues along the way.
- Implemented automated frontend tests with Playwright covering edge cases, reducing manual QA effort and improving release reliability.

ForOurLastNames (FinTech Startup)

Tulsa, OK, USA

Full-Stack Software Engineering Intern

June 2025 – August 2025

- Built and overhauled a Python/Tkinter desktop application end to end, gathering requirements directly from field engineering staff and redesigning the UI around their workflow.
- Developed and improved a spatial GIS chatbot through prompt design, feature implementation, code refinement, and end-to-end testing prior to integration.
- Built Power Automate workflows to streamline internal engineering processes, reducing manual steps in documentation and reporting.

Schneider Electric

Dubai, UAE

Process Automation Intern

June 2024 – July 2024

- Developed an internal automation prototype in Python/Tkinter to replace spreadsheet-heavy procurement workflows, reiterating the design as stakeholder requirements evolved.
- Streamlined retrieval and updating of procurement-related data through backend handling logic built in Python.

PROJECTS

Crescendo Coffee & Café Redesign — PRD, UX Audit, Figma, React, TypeScript

2026

- Authored an end-to-end PRD and UX audit for a live business, then developed an interactive high-fidelity prototype in React and TypeScript to validate a revised ordering experience.

MastodonHub — React, Django, Jest, Jira, Bitbucket

2025

- Served as team lead on a rotating basis: reviewed and approved merge requests, scoped and assigned tickets in Jira/Bitbucket, and unblocked contributors across the team.
- Collaborated across frontend and backend (React/Django), writing Jest tests that contributed to the team's 45% frontend and 95%+ backend test coverage.

Gesture2Globe — MediaPipe, TGCN, ONNX Runtime, Flask, React/Vite

2025

- Built a full-stack pipeline converting live/recorded gestures into structured text, translated output, and speech, using MediaPipe and a TGCN model optimized with ONNX Runtime, with a Flask backend and React/Vite frontend.

SyllabusSync — TypeScript, React, Next.js, Google Gemini API, Vercel

2025

- Built a full-stack TypeScript app end to end, integrating the Google Gemini API to automate syllabus-to-calendar conversion; shipped live to production on Vercel.

CampusMart — React, Node.js, Express.js, MongoDB, Vercel

2024

- Built an e-commerce app end to end: designed MongoDB data schema, built RESTful APIs with Node.js/Express, and created modular React components for listings and browsing.

TECHNICAL SKILLS

Languages & Frameworks: JavaScript, TypeScript, Python, React, Next.js, Node.js/Express, Django, SQL, MongoDB, REST APIs

Engineering Practices: Code Review, Testing (Playwright, Jest), Agile/Scrum, Sprint Planning, Estimation, Git/GitHub, Bitbucket

Tools & AI: Jira, Confluence, Trello, Power Automate, Google Gemini API, Cursor, Copilot, Claude Code

LEADERSHIP & COMMUNITY

- Python Bootcamp:** Co-Owned curriculum design and delivery end to end for a 2-day program, mentoring non-technical business and finance students through data analysis and automation fundamentals.
- Rewriting the Code (RTC):** Student member at Purdue, now an Early Career member; drawn to RTC's mission of empowering and advancing women in tech.
- AUS Community Outreach Volunteer:** Distributed food/water to workers in Sharjah and supported fundraising campaigns for the Ghana Classroom Campaign.

CERTIFICATIONS

- Google Cybersecurity Professional:** Developed proficiency in threat mitigation, risk identification, Linux, SQL, Python, SIEM tools, and intrusion detection systems.
- McKinsey.org Forward Program:** Completed training in structured problem-solving, agile working, digital communication, and business fundamentals.
