EDUCATION

Purdue University Fort Wayne

Master of Science in Computer Science (GPA: 4.0/4.0)

Fort Wayne, IN, USA

August 2024 – May 2026

Relevant Coursework: Software Project Management, Management of Information Technology, Full Stack Web Dev, Human-Computer Interaction, Low-Code/No-Code Rapid Prototyping, Applications of Deep Learning

American University of Sharjah (AUS)

Bachelor of Science in Computer Engineering

Sharjah, UAE

August 2020 – December 2023

EXPERIENCE

Computer Science Intern

City of Fort Wayne, City Utilities Engineering

June 2026 – Present

Fort Wayne, IN, USA

- Led research and data analysis on GIS infrastructure data policy, distilling complex legal and technical constraints into a succinct three-tier classification model adopted for public data-sharing decisions.
- Built and overhauled a Python/Tkinter desktop application for field asset data entry, gathering requirements from field engineering staff to redesign the UI around their real workflow.
- Built Power Automate workflows to streamline internal engineering processes, reducing manual steps in team documentation and reporting tasks.
- Tracked deliverables and cross-team progress using a SharePoint-based project tracker across a 19-member intern group.

Full-Stack Software Engineering Intern

ForOurLastNames (FinTech Startup)

June 2025 – August 2025

Tulsa, OK, U.S.A

- Built and enhanced React + TypeScript components for a financial services product, shipping 9 client-facing features for production workflows.
- Resolved 4 critical UI/UX and responsive layout issues, improving cross-device usability for end users managing their finances.
- Implemented automated frontend tests with Playwright, covering edge cases to reduce manual QA and improve release reliability.
- Partnered closely with QA and a cross-functional Agile team — estimating scope, participating in code reviews, and delivering features across sprints with strong first-pass acceptance.

Process Automation Intern

Schneider Electric

June 2024 – July 2024

Dubai, U.A.E

- Developed an internal automation prototype in Python/Tkinter to replace spreadsheet-heavy procurement workflows, improving data consistency through structured input flows.

PROJECTS

MastodonHub | React, Django, Jest, Jira, Bitbucket

2025

- Managed work as tickets in Jira and Bitbucket as part of a rotating team lead structure — as lead, reviewed and approved teammates' merge requests, checking edge cases and keeping documentation current; as a contributor, scoped tasks and raised PRs for review.
- Collaborated across frontend and backend (React/Django) to keep sprint work well-scoped and unblocked, writing Jest tests that contributed to the team's 45% frontend test coverage milestone.

SyllabusSync | TypeScript, React, Next.js, Google Gemini API, Vercel

2025

- Identified a recurring user pain point and built a full-stack TypeScript app end to end, integrating the Google Gemini API to solve it by automating syllabus-to-calendar conversion; shipped to production on Vercel.

CampusMart | React, Node.js, Express.js, MongoDB, Vercel

2024

- Built an e-commerce app end to end: designed the MongoDB data schema, built RESTful APIs with Node.js/Express, and built modular React components for listings and browsing.

COMMUNITY OUTREACH

- Designed and led a 2-day Python bootcamp curriculum, teaching non-technical business and finance students data analysis and automation — breaking down complex technical concepts for learners with no coding background.
- Volunteered with AUS Community Services & Outreach, distributing food and water to workers in Sharjah and supporting fundraising for the Ghana Classroom Campaign.

TECHNICAL SKILLS

Technical: JavaScript, React, TypeScript, Next.js, Python, Node.js/Express, Django, SQL, MongoDB, REST APIs

Tools: Jira, Trello, Bitbucket, SharePoint, Git/GitHub, Jest, Cypress, Figma, Power Automate

AI & Communication: Google Gemini API, Cursor, Copilot, ChatGPT;

Cross-functional & client-facing communication, stakeholder research & requirements gathering, UX-focused product thinking
